Stork Cooperheat designs, manufactures and supplies quality heat treatment equipment and furnaces, incorporating innovation, versatility and conformance.

Heat treatment requirements are now more demanding than ever. This calls for consistently reliable, quality equipment and consumables, which the customer can be confident in using, every time.

With over 50 years experience in the field of heat treatment, our range of heat treatment consumables and spares caters for all requirements. Our reputation for expertise and excellence is renowned throughout the world; our products are recognised globally for their quality, and high standards of safety, durability and reliability.

Stork Cooperheat's equipment provides the user with the flexibility to heat treat a range of pipe welds at the same time. From simple butt welds to complex pipe work and vessel fabrications, the range can give you a solution tailored to your specifications. The range includes all necessary power control units, temperature control and recording instruments, cables, heating elements, insulation and accessories.

Our sales engineers are dedicated to providing the very best service to all our customers. Their extensive experience in the field of heat treatment ensures that they are fully qualified to discuss your requirements and provide an excellent after sales support.

Global presence... local support

For sales and more information contact your local Stork Cooperheat Equipment specialist at your nearest regional office. Full contact details can be found at the back of this catalogue.

We look forward to working with you.

Spare Advantage 3 programmer/controller

Replacement 'Advantage 3' linkable, programmer/ controller. See 'Advantage 3' data sheet for full details and technical specification.

Stock reference & description: 548-055 - 'Advantage 3' linkable, programmer/controller

Advantage 3 programmer/controller heat treatment unit upgrade kit

Contains the necessary parts and instructions required for upgrading any make or model of heat treatment unit to provide the additional functionality, user benefits and cost savings provided by the 'Advantage 3' linkable programmer/controller. See 'Advantage 3 upgrade kit' technical specification for full details.

Stock reference & description:

12300 - 'Advantage 3' linkable programmer/controller, heat treatment unit upgrade kit

Temperature controller

The CXT1000 temperature controller provides temperature control to a single output channel. The controller raises the temperature of the workpiece to the selected temperature and maintains it at that level. The unit displays both workpiece and set point temperatures.

Stock reference & description: 548-045 - CXT1000 temperature controller

Thermocouple connectors

Type K plug and socket thermocouple connectors. We offer two types of thermocouple plugs, type 516-111 being the standard type normally used with compensating cable. Whereas type 516-115 'quick connection' plugs are ideally suited for use with thermocouple wire where regular connections are required. The 'quick connect' plug can be attached to thermocouple wire in seconds and reduces waste caused by the loss of terminal covers.

Stock reference & description: 516-111 - Type K, inline plug (standard connection) 516-112 - Type K, inline socket 516-115 - Type K, inline plug (quick connection) 516-125 - Type K, panel mounted socket

60A in-line connectors

Spare connectors for repair of splitters and heating elements.

Stock reference & description: 508-009 - 60A brass male connector 508-010 - 60A brass female connector 508-019 - 60A fibre male sleeve for use with 508-009 508-020 - 60A fibre female sleeve for use with 508-010 508-022 - 60A fibre pin for use with 508-019 and 508-020 508-040/M - 12.7mm wide copper shim (per metre) for use with 508-009 and 508-010

300A in-line connectors

Spare connectors for repair of triple cable sets and splitters.

Stock reference & description:

- 508-006 300A brass male connector
- 508-007 300A brass female connector

508-015 - 300A fibre male sleeve for use with 508-006 508-016 - 300A fibre female sleeve for use with 508-007 508-021 - 300A fibre pin for use with 508-015 and 508-016 508-041/M - 19mm wide copper shim (per metre) for use with 508-006 and 508-007

300A panel mounted connectors

Spare panel mounted connector sockets for repair of heat treatment modules and heat treatment units. Supplied complete with fibre washer and lock nut.

Stock reference & description: 508-001 - 300A panel mounted sockets 508-002 - 300A panel mounted plugs 508-003 - 300A panel mounted connector plug with neoprene sleeve

Energy regulator & aluminium knob

Energy regulator for 110V use, aluminium knob and replacement dial for use with 110V energy regulator.

Stock reference & description: 552-012 - Energy regulator 552-014 - Aluminium knob 552-015 - Replacement dial

110V 6 way control plug and socket Spare in line plug and panel mounted socket, for repair of 110V control cables and control inputs and outputs.

Stock reference & description: 516-300 - 7 pin panel mounted male plug 516-301 - 7 pin in line female socket

110V supply plugs and sockets Spare in-line plugs and panel mounted sockets for repair of 110V supply cables and supply outputs. Stock reference & description: 516-040 - Large yellow, 110V, 16A, 3 round pin, Industrial (BS4343) panel mounting socket 516-040/1 - Yellow, 110V, 16A, 3 round pin, Industrial (BS4343) panel mounting socket 516-041 - Yellow, 110V, 16A, 3 round pin, industrial (BS4343) panel mounting socket

110V control plugs and sockets Spare in-line XLR plugs and panel-mounted sockets for repair of 110V control cables and control inputs and outputs.

Stock reference & description: 516-100 - 3 pin XLR type panel mounting plug for 110V contactor control 516-101 - 3 pin XLR type panel mounting socket for 110V contactor control 516-102 - 3 pin XLR type in-line socket for 110V contactor control 516-103 - 3 pin XLR type in-line plug for 110V contactor control

Heater repair kits

Heater repair kits provide a cost effective method of repairing burnt out nickel chrome heating elements by recycling heating element beads and connectors.

The repair kits include the necessary core wire with welded tails and the beads required to replace the few beads that need to be broken to break down a damaged heating element prior to repair. The heating element 'core wire with welded cold tail kits' only include the replacement core wire with welded cold tails.

Stock reference & description:

29448 - 80V (60/16) Heater repair kit c/w beads (5 heaters)

29449 - 60V (60/16) Heater repair kit c/w beads (5 heaters)

29450 - 80V (80/20) Heater repair kit c/w beads (5 heaters)

29451 - 60V (60/16) Replacement heater wire c/w cold tails

29451/30 - 30V (60/16) Replacement heater wire c/w cold tails

29452 - 80V (60/16) Replacement heater wire c/w cold tails

29453 - 80V (80/20) Replacement heater wire c/w cold tails

29455 - 60V (80/20) Heater repair kit c/w beads (5 heaters)

29455/30 - 30V (80/20) Heater repair kit c/w beads (5 heaters)

29456 - 60V (80/20) Replacement heater wire c/w cold tails

29457 - 30V (80/20) Replacement heater wire c/w cold tails

Heater beads

Ceramic, sintered alumina beads for repair and manufacture of ceramic pad heating elements. Stock reference & description: 500-003 - Main body beads 500-001 - Starter beads 500-002 - Finisher beads 500-004 - Main body hole beads 500-008 - Tail beads

Heating element wire Heating element core wire and cold tail wire for repair and manufacture of ceramic pad heating elements.

Stock reference & description: 502-050 - 19 strand 80/20 nickel chrome core wire 502-003 - 19 strand nickel 212 cold tail wire 502-001 - 19 strand 60/16 nickel chrome core wire

Tubular, stainless steel sheathed thermocouples Commonly used for temperature measurement in small furnaces and ovens.

Stock reference & description: 42001 - 0.6m stainless steel sheathed type K thermocouple with fitted thermocouple plug 42002 - 1.8m stainless steel sheathed type K thermocouple with fitted thermocouple plug

Single pole contactors Replacement single pole contactors and contacts for 0-65V and 0-85V output heat treatment modules and units.

Stock reference & description:

526-054/SA - Single pole 250A contactor (assembled) 526-056 - Fixed contact for single pole contactor 526-057 - Moving contact for single pole contactor 526-070 - Single pole contactor for use with units 11000 and 11100

Double pole contactors Replacement single pole contactors and contacts for 32.5-0-32.5V and 42.5-0-42.5V output, heat treatment modules and heat treatment units.

Stock reference & description:

526-059/SA - Double pole 250A contactor (assembled) 526-059/1 - Fixed contact for double pole contactor 526-059/2 - Moving contact for double pole contactor

Circuit breakers Replacement mains circuit breaker for heat treatment modules and heat treatment units.

Stock reference & description: 522-050 - 125A circuit breaker for 50kVA heat treatment modules and heat treatment units 522-051 - 160A circuit breaker for 70kVA heat treatment modules and heat treatment units

522-065 - 160A circuit breaker for use with 11100 unit 522-066 - 100A circuit breaker for use with 11000 unit

Recorder spares

Replacement parts for temperature chart recorders.

Stock reference & description (Chino): 542-230 - 0-1200°C Chart fan fold ET-201 542-231 - Ink (12 Colours) 542-232 - Ink pad 12pt 542-233 - Drive cord 12pt 542-234 - Ink pad case 542-235 - Dotting mechanism 542-236 - Input selector 542-237 - Chart light 542-238 - Choke coil 542-239 - Servo mechanism 542-240 - Paper feed motor 542-242 - Range unit 542-242/1 - Pre amp 12pt 0–1200°C 542-243 - Servo amplifier 12pt 542-244 - Servo motor 12pt 542-245 - Fuse 542-251 - Print mechanism c/w flexi cord 542-259 - Chino scale plate 0-1200°C 542-263 - Fluorescent lamp c/w ballast & starter assembly 542-264 - Door for 12pt Chino recorder

Stock reference & description (Fuji):

542-266 - Chart paper for 12 point Fuji temperature chart recorder 542-277 - Recorder print head cartridge for 12 point Fuji temperature chart recorder

542-278 - Carriage motor for 12 point Fuji temperature chart recorder 542-279 - Chart motor for 12 point Fuji temperature chart recorder 542-280 - Timing belt for 12 point Fuji temperature chart recorder 542-281 - Drive cable for 12 point Fuji temperature chart recorder

TAU spares Replacement parts for Thermocouple Attachment Units (TAUs). Stock reference & description: 558-027 - TAU rechargeable battery, 3 Amp hour, 12V d.c 536-128 - Pliers and magnet set for TAU 536-058 - Replacement TAU shoulder strap and clip

Fuses - various Various fuses and holders available as spares for ourequipment. Common parts detailed below. Stock reference & description: 530-001 - Panel mounting fuseholder 1.25" 530-023 - 200A SIBA flat fuse 530-032 - 200A semiconductor fuse T350 530-053 - 5A glass fuse 1.25" 530-054 - 10A glass fuse 1.25"

Electrical fittings - various

All wiring and cable accessories as used in our equipment are available for purchase. The more common parts detailed below.

Stock reference & description: 558-001 - Large cable ties 558-002 - Small cable ties 558-003 - Large stick on bases 558-004 - Small stick on bases 520-018 - 35 x 8mm copper cable lugs 520-019 - 35 x 10mm copper cable lugs 520-013 - 25 x 8mm copper cable lugs 520-030 - 70 x 10mm copper cable lugs 520-069 - 6.3mm insulated red recepticles 520-070/1 - 6.3mm insulated blue recepticles

FIP magnets

Pair of powerful limpet magnets with cross bar used to quickly clamp Flexible Insulated Preheaters (FIPs) to the workpiece being preheated.

Stock reference & description: 29269 - Assembled pair of limpet magnets with cross bar 536-001 - Replacement, single, limpet magnet

SCU plaque and gasket set Replacement parts for repair of Surface Combustion Units (SCU). Stock reference & description: 6262/P/15 - Replacement set of 6 SCU plaques & gaskets

CONSUMABLES

Thermocouple wire

Type K nickel chrome/nickel aluminium thermocouple wire, insulated with high temperature glass braid. Recommended maximum temperature 800°C. A consumable item, which is used to convert the thermal energy at the hot junction of the thermocouple to an electrical mV signal which can then be used by temperature control and recording instruments to accurately control and record the temperature of the item being heat treated.

Conforms to: BS EN 60584-1 : 1996 part 4 BS EN 60584-2 : 1993 class 1 and ANSI-MC96

The thermocouple wire is attached directly to the work piece using the 'thermocouple attachment unit' stock reference: 41756 (115V unit) or 41757 (230V unit).

Stock reference & description: 43000 - 100m roll of type K thermocouple wire

High temperature putty

A small portion of the soft putty is fixed over the hot junction of the thermocouple, which is attached to the item being heat treated. Once the putty dries, after 20 minutes, it hardens to protect the hot junction and helps avoid possible short circuit of the thermocouple wires which would result in temperature control and recording errors.

Stock reference & description: 43007 - Jar of high temperature putty

Tie wire

For heating element bands of less than 4 heating elements, soft iron wire is adequate to fix the heating elements and insulation around the workpiece.

Stock reference & description: 29266 - Soft iron wire (25kg roll)

CONSUMABIES

Banding tape

For bands of more than 4 heating elements, Cooperheat recommends that steel banding and banding clips are used to ensure the heaters remain in full contact with the pipe.

For temperatures in excess of 650°C we recommend using stainless steel banding and clips.

Please note that mild steel banding should not be used on Chrome Molybdenum post weld heat treatments.

Stock reference & description: 29257 - Mild steel banding (30m roll) 29259 - Stainless steel banding (30m roll)

Banding clips Mild and stainless steel clips for fastening mild and stainless steel banding.

Stock reference & description: 29258 - Mild steel banding clips (box of 100) 29260 - Stainless steel banding clips (box of 100)

Cramp strapping

20 x 1.5mm cramp strapping used for the fixing of insulation to spheres, vessels, tanks and other large diameter vessels. A 150mm spike folds out from the strapping every 300mm for the insulation blanket to be pushed onto and held in place.

Stock reference & description: 29300 - 20 x 1.5mm mild steel cramp strapping per meter

CABLES

Compensating cable link cables To link controller/programmer thermocouple input to the recorder input.

Stock reference & description: 34013 - 3m 'jumper' compensating lead fitted with two type K thermocouple plugs

Programmer/contactor control leads To connect separate, external controller/programmer units output to power source control input.

Stock reference & description: 33009 - 3m, 3-core, programmer/contactor control lead

Thermocouple compensating cable

Suitable for use with type K thermocouples where monitoring thermocouples, in addition to the control thermocouples, are required for temperature monitoring purposes. Available in 30m lengths complete with type K thermocouple plug and socket or in 100m rolls without plug and socket (plugs and sockets can be supplied separately as required).

Stock reference & description: 34000 - 30m compensating cable c/w type K thermocouple plug and socket 504-062 - 100m roll of compensating cable without thermocouple plug or socket

CABLES

Splitter cables

For use with triple cable sets. Splitters are used where the operator needs to connect multiple heating elements, in parallel, to triple cable sets to enable the control of multiple heating elements. This enables the heating elements to be grouped to a single control output from a heat treatment unit to allow accurate zonal temperature control.

Stock reference & description: 32001 - 2 Way splitter 32002 - 3 Way splitter 32003 - 4 Way splitter 32004 - 5 Way splitter

Triple cable sets

For use with heat treatment units controlling 30V, 40V, 60V and 80V heating elements. Includes two double insulated cables for power feed and return, fitted with 300A male and female connectors and one compensating cable fitted with type K thermocouple plug and socket.

Stock reference & description: 35020 - 15m Triple cable set 135A 35024 - 30m Triple cable set 135A 35032 - 30m Triple cable set 180A 35033 - 30m Triple cable set 280A

ACCESSORIES

Thermocouple calibration unit

The hand held VA710 thermocouple calibration unit is an accurate measurement and millivolt source instrument, which is used to calibrate thermocouple instrumentation. It can measure or simulate 8 different thermocouple types and be used as a millivolt source.

The instrument comes with 2 miniature type K thermocouple plugs, 6 x AAA 1.5V batteries, a user's manual and a calibration certificate.

Stock reference & description: 41511 - VA710 thermocouple calibration unit

Clamp meter

The HHM59 is an AC multifunction clamp meter capable of measuring a.c or d.c voltage to 600V, a.c current upto 1000A, resistance upto $2M\Omega$ and temperature upto 750° C using a type K thermocouple. Supplied with 1 x 9V battery and a 1m type K thermocouple. Dimensions are 229(H) x 69(W) x 38(D) mm and weight is 0.31kg.

Stock reference & description: 44007 - HHM59 clamp meter / digital thermometer

Banding machines

For tightening, cutting off and clipping mild and stainless steel banding.

Stock reference & description: 29256 - Winder banding machine 29255 - Ratchet banding machine

ACCESSORIES

Elastic straps

Used to temporarily hold ceramic pad heating elements in place whilst they are correctly positioned and spaced prior to fixing in place with tie wire or banding.

Stock reference & description: 29253 - Elastic, 850mm strap with hooks

Personal Protective Equipment

We are able to supply a comprehensive range of Personal Protective Equipment (PPE). An example list of the items available is detailed below. (For applicable items please state sizes required when ordering).

Safety boots Coveralls Hi-Viz vests and jackets Navy polo shirt Green lined welding gauntlets Safety glasses Safety helmet Disposable dust mask Rigger gloves Ear defenders

INSULATION

Superwool Insulation

Superwool is a high temperature insulating fibre blanket manufactured from Calcium Magnesium Silicate. This material has a thermal performance equivalent to refractory ceramic fibre up to 1200°C. However, unlike ceramic fibre, Superwool is body soluble and has a larger needle particle size. These qualities mean that Superwool represents a lower respiratory hazard than ceramic fibre, although, as with all high temperature insulating fibre, normal respiratory protection in the form of an appropriate dust mask should be worn during handling. Superwool is available in a range of mat sizes, protected by a stainless steel mesh to extend the working life of the insulation. Alternatively, Superwool is also supplied in unmeshed rolls.

Stock reference & description:

96kg per m3 / 128kg per m3

29800 / 29900 - 25mm thick s/s meshed mat 300mm x 300mm

29801 / 29901 - 25mm thick s/s meshed mat 300mm x 600mm

29802 / 29902 - 25mm thick s/s meshed mat 300mm x 900mm

29803 / 29903 - 25mm thick s/s meshed mat 600mm x 600mm

29804 / 29904 - 25mm thick s/s meshed mat 600mm x 900mm

29805 / 29905 - 25mm thick s/s meshed mat 600mm x 1200mm

29806 / 29906 - 25mm thick s/s meshed mat 600mm x 1800mm

29807 / 29907 - 25mm thick s/s meshed mat 300mm x 1800mm

29608 / 29611 - 25mm thick unmeshed roll 7320mm x 600mm

Density: 96kg or 128kg per metre cubed. Material Safety Data

Sheet available upon request.

INSULATION

Cooperknit insulation

Cooperknit insulation is a cost effective knitted, silica fibre with many user benefits including reusability, long life and low risk to user health and safety and minimal skin irritation compared with most other high temperature insulating fibres.

Independent tests on Cooperknit have shown that no respirable fibres were found in any samples after exposure to 1000°C for 24 hours.

Cooperknit can be used repeatedly at continuous operating temperatures up to 950°C without loss of thermal or mechanical properties.

Cooperknit is available in a range of standard mat sizes detailed below, we are also able to supply special mat sizes or configurations to meet your exact requirements. Alternatively, Cooperknit is also supplied in 7.5m long rolls.

Stock reference & description:

- 29700 10mm thick mat 300mm x 600mm
- 29701 10mm thick mat 600mm x 600mm
- 29702 10mm thick mat 900mm x 600mm
- 29703 10mm thick mat 1200mm x 600mm
- 29704 10mm thick mat 1800mm x 600mm
- 29699 10mm thick roll 7500mm x 600mm

GERANG PAD HEATING ELEVIENTS

We incorporate the highest quality materials available in the construction of our Flexible Ceramic Pad (FCP) heating elements. These materials make the heating elements highly durable, which extends the usable life of Cooperheat heating elements beyond that normally expected.

This extended life, high durability and reliability combine to save you money by:

- Reducing reworks and lost time due to heating element failures.
- Reducing your annual costs for replacing or repairing failed or damaged heating elements.

Cooperheat ceramic heating elements are constructed from high grade sintered alumina ceramic beads, nickel chrome core wire and nickel cold tail wire. The construction allows the heating element to be flexible and provides high heat transfer efficiency.

We insist on using high quality, ceramic beads, with a high resistance to thermal and physical shock, in the construction of FCP ceramic heating elements.

The important physical properties, which make these beads superior to other beads used in the heat treatment industry, are detailed in the ceramic bead physical properties table below (all dimensions are nominal):

Alumina content - 95% Bulk density fired - 3.7 Mg/m3 Grain size - 6μm Vickers hardness - 12.5 Rockwell hardness - 78 (R45N) Compressive strength - 2000 MPa Flexural strength - 320MPa (ASTM C1161, 3 point) Young's modulus - 325 Gpa Thermal conductivity - 21W/m3

These beads are supplied to us by one of the leading specialist ceramic manufacturers in the ceramic industry.

The cold tails of Cooperheat ceramic heating elements are butt welded to the heater core wire which eliminates the cold tail/core wire junction failures often seen with low quality heaters which use steel ferrules.

By selection, from the extensive range of Cooperheat FCP heating elements, any pipe size or pipe configuration can be covered so that the correct amount of heating power can be applied to successfully heat treat the pipe weld or other fabrication.

Cooperheat FCP heating elements are manufactured with a range of power ratings for use with a selection of standard voltages.

If you require any special heating element configuration, voltage or power rating, we will use our heat treatment engineering expertise to provide you with a heating element custom built to meet your exact needs.

Cooperheat FCP heating elements can, if handled correctly, be used approximately fifty times at temperatures up to 1050°C (1922°F).

We can provide higher temperature heating elements if required which can be used repeatedly at temperatures up to 1200° C (2192° F).

Heating Element selection guide:

(For heat treatment cycles up to 800°C)

To be used as a guide only. Reference should always be made to specific code or specification heated width requirements.

GERANG PAD HEATING ELEVIENTS

Flexible Insulated Preheaters (FIP's)

Application

FIP's are ideal for preheating welds on vessels, fabrications and large diameter pipework.

Specification

The FIP is constructed using a standard FCP heating element, insulated by a silica fibre mat protected by a stainless steel backing. To hold the FIP onto the workpiece high performance magnets can be supplied either as separate items, or built into the FIP.

80/20 Core Wire FIP Heaters:

(All dimensions are nominal)

| Stock | Туре | Width (tail to tail) | | Length (of heater body) | | Volts | Power |

| 22171 | - | 125 | 5.00 | 585 | 23.00 | 60 | 2.70 |

User Benefits

Optional magnetic attachment for fast, low cost installation;

• Protection from weld splatter;

Operates on low voltage for operator safety;

• Is constructed from high strength materials for on-site reliability.
